IT SUPPORT / HELP DESK TECHNICIAN

Customer-focused IT support candidate with hands-on experience supporting users, troubleshooting account and access issues, documenting technical processes, and maintaining Linux and Windows lab environments. Brings a strong service mindset developed in high-volume operations, combined with formal IT training in networking, systems administration, cloud fundamentals, and security. Fluent in English, Portuguese, and Spanish; conversational French.

CORE SKILLS

- **Technical Support:** User onboarding, account access, password and permission support, hardware and software troubleshooting, remote-user assistance
- **Systems:** Windows 10/11, Windows Server fundamentals, Linux CLI (Debian/Ubuntu/CentOS/Fedora), macOS, basic Active Directory administration
- **Networking:** TCP/IP, DNS, DHCP, IPv4/IPv6, Wi-Fi and connectivity troubleshooting, VPN and remote-access fundamentals
- **Cloud & Productivity Tools:** Google Workspace support, Microsoft 365, Microsoft Azure fundamentals, GoDaddy administration
- **Documentation & Service:** SOPs, knowledge-base articles, ticket documentation, issue tracking, inventory coordination
- **Tools:** Spiceworks, Jira, Zendesk basics, RDP, TeamViewer, SSH, Webmin, VirtualBox, Ansible, basic shell scripting
- **Languages:** English (Fluent), Portuguese (Native), Spanish (Fluent), French (Conversational)

IT EXPERIENCE

Technology Volunteer

Take Trips MES | Remote | June 2026 – Present

- Provide first-line technical support to remote team members, resolving common hardware, software, account-access, and connectivity issues.
- Assist with user onboarding, account configuration, access permissions, and security best practices across cloud-based tools.
- Support Google Workspace, communication platforms, and basic GoDaddy-related administration.
- Create onboarding guides and step-by-step technical documentation that help users solve common issues independently.
- Implemented IT support ticketing system (Spiceworks) to optimize team communication workflows and maintain secure digital tools across the organization.

TECHNICAL PROJECTS

Linux Systems Administration & Automation Lab - Personal Project

- Built and maintained a multi-server Linux lab using Debian, Ubuntu, CentOS, and Fedora virtual machines.
- Used Ansible playbooks to automate software installation, user configuration, SSH access, and administrative tasks across different operating systems.
- Documented solutions and repeatable setup procedures to strengthen troubleshooting and knowledge-sharing skills.

Windows Server, Networking & Web Services Lab - Personal Project

- Built a Windows Server lab in VirtualBox and practiced Active Directory tasks including user accounts, organizational units, password policies, and group policies.
- Configured and tested DNS, DHCP, IP addressing, remote access, and network diagnostic tools in a simulated environment.
- Deployed and maintained basic Linux web services and a personal portfolio website: www.yournextemployee.ca.
- Applied a methodical approach to identifying issues, testing solutions, and documenting outcomes.

PROFESSIONAL EXPERIENCE

Operational Lead / Kitchen Manager

Zante Restaurant | Montreal, QC | April 2022 – Present

- Lead daily operations in a fast-paced environment, prioritizing urgent issues and maintaining reliable service under pressure.
- Train and support team members, communicate clear procedures, and resolve operational issues quickly and professionally.
- Create standard operating procedures and training materials that improve consistency and reduce onboarding time.
- Coordinate equipment repairs with external vendors, track open issues, and follow up through resolution.

EDUCATION & CERTIFICATIONS

AEC Preparation: Cisco CCNA and CompTIA Linux+

Dawson College, Montreal, QC | March 2026 – Present

- Coursework includes networking fundamentals, routing and switching, Linux administration, system troubleshooting, and diagnostic testing.

Google IT Support Professional Certificate - Completed October 2025

- Training in end-user support, operating systems, networking, system administration, troubleshooting, and IT security.

Microsoft Azure Fundamentals (AZ-900) and AI on Azure - Completed January 2025

- Training in cloud concepts, shared-responsibility models, identity, security, governance, and Azure services.
